- "(B) facing sudden and severe economic dislocations because of structural economic changes, changing trade patterns, certain Federal actions (including environmental requirements that result in the removal of economic activities from a locality), impacts from natural disasters, and transitioning industries, including energy generation, steel production, and mining;
- "(2) economic growth in the States, cities, and rural areas of the United States is produced by expanding economic opportunities,

expanding free enterprise through trade, promoting resilience in public infrastructure, creating conditions for job creation, job retention, and business development, and by capturing the opportunities to lead the industries of the future, including advanced technologies, clean energy production, and advanced manufacturing technologies;

"(3) the goal of Federal economic development programs is to raise the standard of living for all citizens and increase the wealth and overall rate of growth of the economy by encouraging communities to develop a more competitive and diversified economic base by—

"(A) creating an environment that promotes economic activity by improving and expanding modern public infrastructure;

"(B) promoting job creation, retention, and workforce readiness through increased innovation, productivity, and entrepreneurship; and

"(C) empowering local and regional communities experiencing chronic high unemployment, underemployment, low labor force participation, and low per capita income to develop private sector business and attract increased private sector capital investment;

### DIVISION G—STATE TRADE EXPANSION PROGRAM

#### SEC. 6001. SHORT TITLE.

This division may be cited as the "State Trade Expansion Program Modernization Act of 2024".

#### SEC. 6002. FINDINGS.

Congress finds the following:

- (1) The State Trade Expansion Program established under section 22(1) of the Small Business Act (15 U.S.C. 649(1)) (in this section referred to as "STEP") was created by Congress in 2010 to grow the number of small business concerns (as defined under section 3 of such Act (15 U.S.C. 632) and in this section referred to as a "small business concern") that export, increase the value of goods exported by the small business sector, and help businesses identify new markets.
- (2) Helping small firms in the United States begin to export or build upon their existing export capacity generates investment in local economies and spurs employment.
- (3) Despite 95 percent of global consumers living outside of the United States, less than 4 percent of small business concerns in the United States export their products or services.
- (4) Many small business concerns in the United States that could grow by exporting lack the dedicated staff, required technical skills, and necessary budgetary resources for international expansion.
- (5) STEP provides vital assistance to small business concerns, particularly to those that have never had the opportunity to sell their products or services abroad.
- (6) According to data of the Bureau of the Census, there were approximately 5,900,000 employer firms in the United States as of 2021, of which more than 1,200,000, or approximately 22 percent, were women-owned. However, according to the data, of the 128,460 exporting small firms, only 21,626, or 17 percent, were women-owned firms, meaning that, of small firms, 5 times as many maleowned firms export as women-owned firms. The data show that the overall disparity in business ownership between men and women is even greater among exporting businesses.
- (7) According to research conducted by the Small Business Administration, smaller firms tend to produce fewer outputs and are less likely to export than larger firms. Data of the Bureau of the Census show that women-owned firms employ 33 percent fewer workers on average than male-owned firms and are less likely to enjoy the benefits of international trade.
- (8) Exporting is a highly effective way for businesses to expand their markets and increase their productivity. As States expand export-enhancing activities through STEP, additional small firms will benefit from the higher demand for their goods and services and increased profits associated with international trade.
- (9) During the first 10 years of operation, STEP enabled more than 12,000 small business concerns to explore export opportunities, helping them reach markets in 141 countries.
- (10) Congress recognizes that STEP can be improved to reduce the administrative burden for grantees, streamline reporting and compliance requirements, give grantees more flexibility, make grant awards more transparent and consistent, and set more predictable application deadlines.
- (11) Congress also recognizes that making awards under STEP more consistent and transparent will simplify the program and incentivize more States to participate so that small business concerns are supported in all States.
